WARNING

To reduce the risk of fire or electric shock, do not expose this apparatus to rain or moisture.

To avoid electrical shock, do not open the cabinet. Refer servicing to qualified personnel only.

WARNING
THIS APPARATUS MUST BE EARTHED.

IMPORTANT
The nameplate is located on the bottom.

WARNING
This unit has no power switch. When installing the unit, incorporate a readily accessible disconnect device in the fixed wiring, or connect the power cord to socket-outlet which must be provided near the unit and easily accessible. If a fault should occur during operation of the unit, operate the disconnect device to switch the power supply off, or disconnect the power cord.

CAUTION
Danger of explosion if battery is incorrectly replaced. Replace only with the same or equivalent type recommended by the manufacturer. Dispose of used batteries according to the manufacturer’s instructions.

For the customers in the USA
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
– Reorient or relocate the receiving antenna.
– Increase the separation between the equipment and receiver.
– Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
– Consult the dealer or an experienced radio/TV technician for help.
You are cautioned that any changes or modifications not expressly approved in this manual could void your authority to operate this equipment.

All interface cables used to connect peripherals must be shielded in order to comply with the limits for a digital device pursuant to Subpart B of Part 15 of FCC Rules.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

If you have any questions about this product, you may call: Sony Customer Information Service Center 1-800-222-7669 or http://www.sony.com/
The number below is for FCC related matters only.

Declaration of Conformity
Trade Name: SONY
Model: VPL-ES3, VPL-EX3
Responsible Party: Sony Electronics Inc.
Address: 16530 Via Esprillo, San Diego, CA 92127 U.S.A.
Telephone Number: 858-942-2230

WARNING: THIS WARNING IS APPLICABLE FOR USA ONLY.
If used in USA, use the UL LISTED power cord specified below.
DO NOT USE ANY OTHER POWER CORD.

Plug Cap  Parallel blade with ground pin
(NEMA 5-15P Configuration)
Cord Type  SJT, three 16 or 18 AWG wires
Length Minimum 1.5m (4 ft .11in.), Less
than 2.5 m (8 ft .3 in.)
Rating Minimum 10A, 125V

Using this unit at a voltage other than 120V may require the use of a different line cord or attachment plug, or both.
To reduce the risk of fire or electric shock, refer servicing to qualified service personnel.

WARNING: THIS WARNING IS APPLICABLE FOR OTHER COUNTRIES.

1. Use the approved Power Cord (3-core mains lead) / Appliance Connector / Plug with earthing-contacts that conforms to the safety regulations of each country if applicable.
2. Use the Power Cord (3-core mains lead) / Appliance Connector / Plug conforming to the proper ratings (Voltage, Ampere).

If you have questions on the use of the above Power Cord /Appliance Connector /Plug, please consult a qualified service personnel.

Disposal of Old Electrical & Electronic Equipment (Applicable in the European Union and other European countries with separate collection systems)

This symbol on the product or on its packaging indicates that this product shall not be treated as household waste. Instead it shall be handed over to the applicable collection point for the recycling of electrical and electronic equipment. By ensuring this product is disposed of correctly, you will help prevent potential negative consequences for the environment and human health, which could otherwise be caused by inappropriate waste handling of this product. The recycling of materials will help to conserve natural resources. For more detailed information about recycling of this product, please contact your local city office, your household waste disposal service or the shop where you purchased the product.

For the customers in Taiwan only

Precautions

Safety

- Check that the operating voltage of your unit is identical with the voltage of your local power supply.
- Should any liquid or solid object fall into the cabinet, unplug the unit and have it checked by qualified personnel before operating it further.
- Unplug the unit from the wall outlet if it is not to be used for several days.
- To disconnect the cord, pull it out by the plug. Never pull the cord itself.
- The wall outlet should be near the unit and easily accessible.
- The unit is not disconnected to the AC power source (mains) as long as it is connected to the wall outlet, even if the unit itself has been turned off.
- Do not look into the lens while the lamp is on.
- Do not place your hand or objects near the ventilation holes. The air coming out is hot.
- Be careful not to get your fingers caught in the adjuster.
- Do not spread a cloth or paper under the unit.

Illumination

- To obtain the best picture, the front of the screen should not be exposed to direct lighting or sunlight.
- Ceiling-mounted spot lighting is recommended. Use a cover over fluorescent lamps to avoid lowering the contrast ratio.
- Cover any windows that face the screen with opaque draperies.
- It is desirable to install the unit in a room where floor and walls are not of light-reflecting material. If the floor and walls are of reflecting material, it is recommended that the carpet and wall paper be changed to a dark color.

Preventing internal heat build-up

After you turn off the power with the I/ key, do not disconnect the unit from the wall outlet while the cooling fan is still running.

Caution

The unit is equipped with ventilation holes (intake) and ventilation holes (exhaust). Do not block or place anything near these holes, or internal heat build-up may occur, causing picture degradation or damage to the projector.

Cleaning

- To keep the cabinet looking new, periodically clean it with a soft cloth. Stubborn stains may be removed with a cloth lightly dampened with a mild detergent solution. Never use strong solvents, such as thinner, benzene, or abrasive cleansers, since these will damage the cabinet.
- Avoid touching the lens. To remove dust on the lens, use a soft dry cloth. Do not use a damp cloth, detergent solution, or thinner.
- Clean the filter at regular intervals.

LCD data projector

- This LCD data projector is manufactured using high-precision technology. You may, however, see tiny black points and/or bright points (red, blue, or green) that appear continuously on the LCD data projector. This is a normal result of the manufacturing process and does not indicate a malfunction.
Notes on Installation and Usage

Unsuitable Installation

Do not install the projector in the following situations. **Installation in these situations or locations may cause a malfunction or damage** to the unit.

**Poorly ventilated locations**

- Allow adequate air circulation to prevent internal heat build-up. Do not place the unit on surfaces (rugs, blankets, etc.) or near materials (curtains, draperies) that may block the ventilation holes. When internal heat builds up due to blockage of ventilation holes, the temperature sensor will function, and the power will be turned off automatically.
- Leave space of more than 30 cm (11 7/8 inches) around the unit.
- Be careful not to allow the ventilation holes to inhale tiny objects such as pieces of paper or clumps of dust.

**Hot and humid**

- Avoid installing the unit in a location where the temperature or humidity is very high, or the temperature is very low.
- To avoid moisture condensation, do not install the unit in a location where the temperature may rise rapidly.

**Locations subject to direct cool or warm air from an air-conditioner**

Installing the projector in such a location may cause a malfunction of the unit due to moisture condensation or a rise in temperature.

**Near a heat or smoke sensor**

Malfunction of the sensor may occur.
Very dusty, extremely smoky locations

Avoid installing the unit in a very dusty or extremely smoky environment. Otherwise, the air filter will become obstructed, and this may cause a malfunction of the unit or damage it. Dust preventing the air passing through the filter may cause a rise in the internal temperature of the unit. Clean the filter periodically.

Unsuitable Conditions

Do not use the projector under the following conditions.

Standing the unit upright on one side

Avoid using the unit standing upright on its side. It may cause malfunction.

Tilting the unit to the right or left

Avoid tilting the unit to an angle of 15°, and avoid installing the unit in any way other than placing it on a level surface or suspending from the ceiling. Such an installation may cause color shading or shorten the lamp life excessively.

Blocking the ventilation holes

Avoid using a thick-piled carpet or anything that covers the ventilation holes (exhaust/intake); otherwise, internal heat may build up.

Placing a blocking object just in front of the lens

Do not place any object just in front of the lens that may block the light during projection. Heat from the light may damage the object. Use the PIC MUTING key on the Remote Commander to cut off the picture.

Usage at High Altitude

When using the projector at an altitude of 1,500 m or higher, turn on “High Altitude Mode” in the INSTALL SETTING menu. Failing to set this mode when using the projector at high altitudes could have adverse effects, such as reducing the reliability of certain components.

Note on carrying the projector

The unit is manufactured using high-precision technology. When transporting the unit stored in the carrying case, do not drop the unit or subject it to shock, as this may cause damage. When storing the unit in the carrying case, disconnect the AC power cord and all other connecting cables or cards, and store the supplied accessories in a pocket of the carrying case.

Note on the screen

When using a screen with an uneven surface, a striped pattern may rarely appear on the screen depending on the distance between the screen and the projector or the zooming magnification settings used. This is not a malfunction of the projector.
Overview

Features

High brightness, high picture quality

High brightness
Adopting Sony's unique optical system that provides a high-efficiency optical system. It allows the 165 W lamp to give a light output of 2000 ANSI lumen.

High picture quality
VPL-ES3: Three super-high-aperture 0.63-inch SVGA panels with approximately 480,000 effective pixels, produce a resolution of 800 × 600 dots (horizontal/vertical) for RGB input, and 500 horizontal TV lines for video input.
VPL-EX3: Three super-high-aperture 0.63-inch XGA panels with approximately 790,000 effective pixels, produce a resolution of 1024 × 768 dots (horizontal/vertical) for RGB input, and 750 horizontal TV lines for video input.

Quiet presentation environment
Low fan noise reduces distraction allowing you to run an optimum presentation even in a quiet environment.

Short focal lens
The projection distance is very short, approximately 2.3 m (7.5 feet), when projecting an 80-inch image, which allows projection on a larger screen even in a limited space.

Security Functions

Security lock
This function makes it possible to prevent projection of a picture on the screen unless the required password is entered when the projector is turned on.

Panel key lock
This function locks all the keys on the control panel of the projector, allowing use of the keys on the Remote Commander. This prevents the projector from operating incorrectly.

About Trademarks
- Adobe Acrobat is a trademark of Adobe Systems Incorporated.
- Windows is a registered trademark of Microsoft Corporation in the United States and/or other countries.
- VGA, SVGA, XGA and SXGA are registered trademarks of the International Business Machines Corporation, U.S.A.
- Kensington is a registered trademark of Kensington Technology Group.
- Macintosh is a registered trademark of Apple Computer, Inc.
- VESA is a registered trademark of the Video Electronics Standard Association.
- Display Data Channel is a trademark of the Video Electronics Standard Association.
Location and Function of Controls

Top/Right Side/Front

1 Control panel
   For details, see “Control Panel” on page 10.
2 Zoom ring
   Adjusts the picture size.
3 Ventilation holes (intake)
4 Focus ring
   Adjusts the picture focus.
5 Security lock
   Connects to an optional security cable (from Kensington).
   Web page address: http://www.kensington.com/

6 Front remote control detector
7 Lens
   Remove the lens cover before projection.
8 Ventilation holes (exhaust)
9 Adjuster adjustment button
   For details, see “Using the adjuster” on page 17.
10 Adjuster
11 Connector Panel
   For details, see “Connector Panel” on page 11.
12 Speaker
13 Adjusters (hind pad)
14 Lamp cover
15 Rear remote control detector
16 AC IN socket
   Connects the supplied AC power cord.
17 Ventilation holes (intake)/Air filter cover

Notes
- Do not place anything near the ventilation holes as this may cause internal heat build-up.
- Do not place your hand near the ventilation holes as this may cause injury.
- To maintain optimal performance, clean the air filter every 500 hours.

For details, see “Cleaning the Air Filter” on page 36.
1 (On/Standby) key
Turns on the projector when the projector is in standby mode. The ON/STANDBY indicator around the (On/Standby) key flashes in green until the projector is ready to operate.

2 ON/STANDBY indicator (located around the (On/Standby) key)
Lights up or flashes under the following conditions:
- Lights in red when the AC power cord is plugged into a wall outlet. Once the projector is in standby mode, you can turn it on with the (On/Standby) key.
- Lights in green when the power is turned on, and when it is ready to operate.
- Flashes in green from the projector is turned on until the projector is ready to operate. Also, flashes in green while the cooling fan is running after the power is turned off with the (On/Standby) key. The fan runs for about 90 seconds after the power is turned off.

For detail on the (On/Standby) indicator, see page 18.

3 MENU key
Displays the on-screen menu. Press again to clear the menu.

4 PUSH ENTER/ (Arrow) keys
Used to enter the settings of items in the menu system, select a menu, or make various adjustments.

5 INPUT key

6 Status indicators
- POWER SAVING
  Lights when the projector is in power saving mode.
- TEMP (Temperature)/FAN
  Lights or flashes under the following conditions:
  - Lights when the temperature inside the projector becomes unusually high.
  - Flashes when the fan is broken.
- LAMP/COVER
  Lights or flashes under the following conditions:
  - Lights when the lamp has reached the end of its life or reaches a high temperature.
  - Flashes when the lamp cover or air filter cover is not secured firmly.

For details, see page 39.
1 VIDEO INPUT connector
- **S VIDEO (mini DIN 4-pin):** Connects to the S video output (Y/C video output) of video equipment.
- **VIDEO (phono type):** Connects to the composite video output of video equipment.
- **AUDIO jack (stereo minijack):** To listen to sound output from video equipment, connect via this jack to the audio output of the video equipment.

To listen to sound output from a computer with the VPL-ES3, connect via this jack to the audio output of the computer.

2 INPUT connector
- **AUDIO INPUT A/B jack (stereo minijack) (for VPL-EX3 only):** To listen to sound output from a computer, connect via this jack to the audio output of the computer. (common INPUT A/B)
- **INPUT A (HD D-sub 15-pin, female):** Inputs a computer signal, video GBR signal, component signal, or DTV signal depending on the connected equipment. Connects to equipment using the supplied cable or an optional cable.

*For details, see “Connecting a Computer” on page 14 and “Connecting a VCR” on page 15.*
- **INPUT B connector (HD D-sub 15-pin) (for VPL-EX3 only):** Connect to external equipment such as a computer. Connect to the monitor output of a computer.

3 OUTPUT connector
- **MONITOR (HD D-sub 15-pin, female):** Connect to the video input connector of the monitor. Outputs signals from the selected channel and computer signals only from among the signals from the INPUT A or INPUT B (VPL-EX3 only).
- **AUDIO (stereo minijack):** Connects to external active speakers. The volume of the speakers can be controlled by the VOLUME +/– keys on the Remote Commander.

For the VPL-EX3, when INPUT A or INPUT B is selected, the sound input to the AUDIO (AUDIO INPUT A/B) connector which is common for INPUT A/B is output. When VIDEO or S VIDEO is selected, the sound input to the AUDIO input connector of VIDEO IN is output.

4 RS-232C connector (D-sub 9-pin, female)
Connects to a computer to operate the projector from the computer.

Remote Commander

The keys that have the same names as those on the control panel function identically.

1 INPUT key

2 APA (Auto Pixel Alignment) key
Automatically adjusts a picture to its clearest while a signal is input from a computer.

*For details, see “Smart APA” in “The SET SETTING Menu” on page 28.*
3. KEYSTONE (Trapezoidal distortion correction) key

Adjusts the vertical trapezoidal distortion of the image. Pressing this key, the adjustment menu are displayed. Use the arrow keys (↑/↓/←/→) for adjustment.

4. RESET key

Resets the value of an item to its factory preset value or returns the enlarged image to its original size. This key functions when the menu or a setting item is displayed on the screen.

5. PIC MUTING key

Cuts off the picture. Press again to restore the picture.

6. FREEZE key

Freezes the projected picture. To cancel the frozen picture, press the key again.

7. D ZOOM (Digital Zoom) +/- key

Enlarges the image at a desired location on the screen.

8. Infrared transmitter

9. I/○ (On/Standyby) key

10. ▲/▼/◄/► (Arrow) keys

11. ENTER key

12. MENU key

13. VOLUME +/- keys

---

Before using the Remote Commander

Pull out the clear film from the lithium battery holder.

To replace a battery

1. Release the lock of the lithium battery holder by picking it, and pull out the holder from the Remote Commander.

2. Install the lithium battery.

3. Put the lithium battery holder back into the Remote Commander.

Notes on the lithium battery

- A button type lithium battery (CR2025) is used in the Remote Commander. Do not use batteries other than CR2025.
- Keep the lithium battery out of the reach of children.
- Should the battery be swallowed, immediately consult a doctor.

Notes on Remote Commander operation

- Make sure that nothing obstructs the infrared beam between the Remote Commander and the remote control detector on the projector. Direct the Remote Commander toward the remote control detector.
- The operation range is limited. The shorter the distance between the Remote Commander and the remote control detector is, the wider the angle within which the commander can control the projector becomes.
Installing the Projector

The distance between the lens and the screen varies depending on the size of the screen. Use the following table as a guide.

There may be a slight difference between the actual value and the design value shown in the table above.

*For details on installation diagram, see “Installation Diagram” on page 46.*
Connecting the Projector

When you connect the projector, make sure to:

- Turn off all equipment before making any connections.
- Use the proper cables for each connection.
- Insert the cable plugs firmly; loose connections may increase noise and reduce performance of picture signals. When pulling out a cable, be sure to pull it out by the plug, not the cable itself.

Connecting a Computer

This section describes how to connect the projector to a computer. For more information, refer to the computer’s instruction manual.

To connect a computer

Notes
- For stereo audio connection, connect the stereo audio connecting cable to the AUDIO connector for VPL-ES3, or to the AUDIO INPUT A/B connector for VPL-EX3.
- The projector accepts VGA, SVGA, XGA, SXGA, and SXGA+ signals. However, we recommend that you set the output mode of your computer to SVGA (VPL-ES3) or XGA (VPL-EX3) mode for the external monitor.
- If you set your computer, such as a notebook computer, to output the signal to both your...
computer’s display and the external monitor, the picture of the external monitor may not appear properly. Set your computer to output the signal to only the external monitor.

For details, refer to the operating instructions supplied with your computer.

**Note**

To connect a Macintosh computer equipped with a video output connector of a type having two rows of pins, use a commercially available plug adaptor.

---

### Connecting a VCR

This section describes how to connect the projector to a VCR. For more information, refer to the instruction manuals of the equipment you are connecting.

**To connect to a video or S video output connector**

1. **Stereo audio connecting cable (not supplied)** (Use a no-resistance cable.)
2. **Video cable (not supplied) or S-Video cable (not supplied)**

![Diagram of VCR connection]
To connect to a video GBR/Component output connector

1. Signal Cable (not supplied)
   HD D-sub 15-pin (male) ↔ 3 × phono jack
2. Stereo audio connecting cable (not supplied)
   (Use a no-resistance cable.)

Notes
- For stereo audio connection, connect the stereo audio connecting cable to the AUDIO connector for VPL-ES3, or to the AUDIO INPUT A/B connector for VPL-EX3.
- Set the aspect ratio using “Wide Mode” on the INPUT SETTING menu according to the input signal.
- When you connect the projector to a video GBR output connector, select “Video GBR” or when you connect the projector to a component output connector, select “Component” with the “Input-A Signal Sel.” setting on the SET SETTING menu.
- Use the composite sync signal when you input the external sync signal from video GBR/component equipment.

Projecting

1. Plug the AC power cord into a wall outlet, and connect all equipment, then remove the lens cover. The ON/STANDBY indicator lights in red and the projector goes into standby mode.
2. Press the I/(STANDBY) key. The ON/STANDBY indicator lights after flashing in green. The projector cannot be used while the ON/STANDBY indicator is flashing.
3. Turn on the equipment connected to the projector.
4 Press the INPUT key to select the input source.
Each time you press the key, the input signal switches as follows:

<table>
<thead>
<tr>
<th>To input from</th>
<th>Press INPUT to display</th>
</tr>
</thead>
<tbody>
<tr>
<td>Computer/Component connected to the INPUT A connector</td>
<td>Input-A</td>
</tr>
<tr>
<td>Computer connected to the INPUT B connector</td>
<td>Input-B</td>
</tr>
<tr>
<td>Video equipment connected to the VIDEO input connector</td>
<td>Video</td>
</tr>
<tr>
<td>Video equipment connected to the S VIDEO input connector</td>
<td>S-Video</td>
</tr>
</tbody>
</table>

Smart APA (Auto Pixel Alignment) adjusts the picture of the connected equipment so that it is projected clearly.

**Notes**
- If “Auto Input Search” is set to “On,” the projector searches for the signals from the connected equipment and displays the input channel where the input signals are found. 
  For details, see “Auto Input Search” on page 28.
- The Smart APA feature is effective for the input signal from a computer only.

5 Switch the equipment connected to output to the projector.
Depending on the type of your computer, for example a notebook, or an all-in-one LCD type, you may have to switch the computer to output to the projector by pressing certain keys (e.g., LCD/VGA, , etc.), or by changing your computer’s settings.

6 Adjust the upper or lower position of the picture.
Use the adjuster to adjust the picture position.

**Using the adjuster**
Lift the projector while pressing the adjuster adjustment button, and adjust the tilt of the projector, then release the button to lock the adjuster.

**Notes**
- Be careful not to let the projector down on your fingers.
- Do not push hard on the top of the projector with the adjuster out. It may be occurred malfunction.

7 Adjust the trapezoidal distortion ( or ) of the picture. Press the KEYSTONE key on the Remote Commander to display the adjustment menu and adjust the tilt using the keys.
Turning Off the Power

1 Press the I/○ key.
   “POWER OFF? Please press I/○ key again.” appears to confirm that you want to turn off the power.

   **Note**
   The message disappears if you press any key other than the I/○ key, or if you do not press any key for five seconds.

2 Press the I/○ key again.
   The ON/STANDBY indicator flashes in green and the fan continues to run to reduce the internal heat. Also, the ON/STANDBY indicator flashes quickly for the first 45 seconds. During this time, you will not be able to light up the ON/STANDBY indicator again with the I/○ key.

3 Unplug the AC power cord from the wall outlet after the fan stops running and the ON/STANDBY indicator lights in red.

   **Note**
   Do not unplug the AC cord while the fan is still running; otherwise, the fan will stop even though the internal heat is still high, which could result in a breakdown of the projector.
Selecting the Menu Language

You can select one of fifteen languages for displaying the menu and other on-screen displays. The factory setting is English. To change the menu language, proceed as follows:

1. Plug the AC power cord into a wall outlet.
2. Press the I/– key to turn on the projector.
3. Press the MENU key. The menu appears. The menu currently selected is shown as a yellow button.
4. Press the ▲ or ▼ key to select the MENU SETTING menu, then press the ◄ or ENTER key. The selected menu appears.
5. Press the ▲ or ▼ key to select “Language,” then press the ◄ or ENTER key.
6. Press the ▲, ▼, ◄ or ► key to select a language, then press the ENTER key. The menu changes to the selected language.

To clear the menu
Press the MENU key. The menu disappears automatically if a key is not pressed for one minute.
Security Lock

The projector is equipped with a security lock function. When you turn the power of the projector on, you are required to input the previously set password. If you do not input the correct password, you will not be able to project the picture.

Note
You will not be able to use the projector if you forget your password and the password administrator is not available. Be please aware that using the security lock can prevent valid usage in such cases.

To use the security lock

1 Press the MENU key and then, on the INSTALL SETTING menu, turn on the “Security Lock” setting.

2 Enter the password.
Use the MENU, \(\leftarrow/\rightarrow/\uparrow/\downarrow\), and ENTER keys to enter the four-digit password. (The default initial password setting is “ENTER, ENTER, ENTER, ENTER.” After this is entered you can put in your own password. Therefore, when you use this function for the first time, please input “ENTER” four times.)

Next, the screen for entering the new password is displayed. (Enter the password on this screen even if you want to keep the current password.)

Enter the password on this screen.

3 Enter the password again to confirm.

When the following message is displayed, the setting for security lock is completed.

Security Lock enabled!

If “Invalid Password!” is displayed on the screen, perform this procedure again from step 1.

4 Turn the main power off and disconnect the AC power cord. The security lock is set to on, then it becomes effective. The screen used for entering the password is displayed when the power is turned on the next time.

Security certification

When the password screen is displayed, enter the password that was set. If you fail to enter the correct password after three tries, the projector cannot be used. In this case, press the I/\(\) key to turn off the power.

To cancel the security lock

1 Press the MENU key, then turn off the “Security Lock” setting on the INSTALL SETTING menu.
2 Enter the password.
Enter the password that was set.

**Note**

If you call the customer service center because you have forgotten the password, you will need to be able to verify the projector's serial number and your identity. (This process may differ in other countries/regions.) Once your identity has been confirmed, we will provide you with the password.

---

### Effective Tools for Your Presentation

#### To enlarge the image (Digital Zoom function)

You can select a section of the image to enlarge. This function works when a signal from a computer is input. This function does not work when a video signal is input.

1. Project a normal image, and press the D ZOOM + key on the Remote Commander.
   The digital zoom icon appears in the center of the image.

   ![Digital zoom icon](image)

2. Move the icon to the point on the image you want to enlarge. Use the arrow key (▲/▼/◄/►) to move the icon.

3. Press the D ZOOM + key again.
The portion of the image where the icon is located is enlarged. The enlargement ratio is displayed on the screen for a few seconds.

   By pressing the + key repeatedly, the image size (ratio of enlargement: max. 4 times) increases.
Use the arrow key (▲/▼/◄/►) to scroll the enlarged image.

**To return the image to its original size**
Press the D ZOOM – key. Just pressing the RESET key returns the image back to its original size immediately.

**To freeze the image projected (Freeze function)**
Press the FREEZE key. “Freeze” appears when the key is pressed. This function works when a signal from a computer is input. To restore the original screen, press the FREEZE key again.
Adjustments and Settings Using a Menu

Using a MENU

The projector is equipped with an on-screen menu for making various adjustments and settings.

Display items

- Input signal indicator

![Input signal indicator]

- Input signal setting indicator

Picture adjustment menu

![Picture adjustment menu]

Input signal indicator
Shows the selected input channel.  is displayed when no signal is input. You can hide this indicator using “Status” on the MENU SETTING menu.

Input signal setting indicator
For Input-A: Shows “Auto.”
For Video/S-Video input: Shows “Auto” or the “Color System” setting on the SET SETTING menu.

1 Press the MENU key.
The menu appears.
The menu presently selected is shown as a yellow button in the column on the left.

2 Use the ▲ or ▼ key to select a menu, then press the ► or ENTER key.
The selected menu appears.

3 Select an item.
Use the ▲ or ▼ key to select the item, then press the ► or ENTER key.
The setting items are displayed in a pop-up menu or in a sub menu.

Pop-up menu

![Pop-up menu]

4 Make the setting or adjustment of an item.
- When changing the adjustment level:
  To increase the number, press the ▲ or ► key.
  To decrease the number, press the ▼ or ◄ key.
  Press the ENTER key to restore the previous screen.

- When changing the setting:
  Press the ▲ or ▼ key to change the setting.
  Press the ENTER or ◄ key to restore the previous screen.
To clear the menu
Press the MENU key.
The menu disappears automatically if a key is not pressed for one minute.

To reset items that have been adjusted
Select the item that you want to reset, and then press the RESET key on the Remote Commander.
“Complete!” appears on the screen and the setting of the item that you have selected is factory preset values.

Storage of the settings
The settings are automatically stored in the projector memory except the settings for items (‘Dot Phase,” “H Size” and “Shift” etc..) in the “Adjust Signal...” and the “Color System” when the ENTER key is pressed.

If no signal is input
If there is no input signal, “Cannot adjust this item.” appears on the screen.

Unadjustable items
Items that cannot be adjusted, depending on the input signal, are not displayed on the menu.

For details, see page 33.
The PICTURE SETTING Menu

The PICTURE SETTING menu is used for adjusting the picture or volume. Items that can be adjusted or set depend on the kind of input signals. For details, see “Input signals and adjustable/setting items” on page 33.

Adjusments and Settings Using a Menu

Note that if the projector is used for profit or for public viewing, modifying the original picture by switching to the wide mode may constitute an infringement of the rights of authors or producers, which are legally protected.

### About the Preset Memory No.

This projector has 40 types of preset data for input signals (the preset memory). When a preset signal is input, the projector automatically detects the signal type and recalls the data for the signal from the preset memory to adjust it to an optimum picture. The memory number and signal type of that signal are displayed on the INFORMATION menu (See page 32). You can also adjust the preset data through the INPUT SETTING menu.

*See the chart on page 44 to find if the signal is registered in the preset memory.*

**Note**

When the aspect ratio of input signal is other than 4:3, a part of the screen is displayed in black.

<table>
<thead>
<tr>

</tr>
</thead>
</table>
| Smart APA              | The APA (Auto Pixel Alignment) automatically adjusts “Dot Phase,” “H Size” and “Shift” on the INPUT SETTING menu for the input signal from a computer.  
  • **On**: When a signal is input from a computer, the APA functions automatically so that the picture can be seen clearly. Once the specified input signal has been adjusted by the “Smart APA,” it will not be readjusted even when the cable is disconnected and connected again or the input channel is changed. You can adjust the picture by pressing the APA key on the Remote Commander even if “Smart APA” set to “On.”  
  • **Off**: The APA functions when you press the APA key on the Remote Commander. | On               |
| Auto Input Search      | When set to “On,” the projector detects input signals in the following order: Input-A/Input-B (VPL-EX3 only)/Video/S-Video. It indicates the input channel when the power is turned on or the INPUT key is pressed. | Off             |
| Input-A Signal Sel.    | Selects the “Component” or “Video GBR” signal input via the INPUT A channel.  
  When a signal is input from a computer, this item is not displayed on the screen because this unit automatically recognizes the signal. | Component        |
| Color System           | Selects the color system of the input signal.  
  If you select “Auto,” the projector detects the color system of the input signal automatically. If the picture is distorted or colorless, select the color system according to the input signal.  
  Whenever the computer starts, the color system is set to “Auto.” | Auto             |
| Power Saving           | When set to “On,” the projector goes into power saving mode if no signal is input for 10 minutes. Although the lamp goes out, the cooling fan keeps running. The power saving mode is canceled when a signal is input or any key is pressed. In power saving mode, no keys function for the first 45 seconds after the lamp goes out. | Off             |
The SET SETTING Menu

Adjustments and Settings Using a Menu

Press the APA key when the full image is displayed on the screen. If the projected image includes a black portion around it, the APA function will not work properly and some parts of the image may not be displayed on the screen.

You can cancel the adjustment by pressing the APA key again while “Adjusting” appears on the screen.

The picture may not be adjusted properly depending on the type of input signal.

Adjust the “Dot Phase,” “H Size,” and “Shift” items on the INPUT SETTING menu when you adjust the picture manually.

</table>
| IR Receiver       | Selects the remote control detectors (IR Receiver) on the front and rear of the projector.  
                   | • **Front & Rear**: Activates both the front and rear detectors.  
                   | • **Front**: Activates the front detector only.  
                   | • **Rear**: Activates the rear detector only. | Front & Rear |
| Panel Key Lock    | Locks all the control panel keys on the top panel of the projector so that the projector can be operated only with the Remote Commander.  
                   | To lock the control panel keys, set to “On.”  
                   | When it is set to “On,” keeping the I/O key on the control panel pressed for 10 seconds turns the projector on when it is in standby mode, and turns the projector to standby mode when the power is on. If you press and hold the MENU key for about 10 seconds when the power is on, the lock will be released and “Panel Key Lock” is automatically set to “Off.” | Off |

Notes

- Press the APA key when the full image is displayed on the screen. If the projected image includes a black portion around it, the APA function will not work properly and some parts of the image may not be displayed on the screen.
- You can cancel the adjustment by pressing the APA key again while “Adjusting” appears on the screen.
- The picture may not be adjusted properly depending on the type of input signal.
- Adjust the “Dot Phase,” “H Size,” and “Shift” items on the INPUT SETTING menu when you adjust the picture manually.
The MENU SETTING Menu

The MENU SETTING menu is used for changing the menu displays.

Replacing the Lamp

The lamp used as a light source is consumable product. Thus replace the lamp with a new one in the following cases.
- When the lamp has burnt out or dims
- “Please replace the Lamp.” appears on the screen
- The LAMP/COVER indicator lights up

The lamp life varies depending on conditions of use.
Use an LMP-C162 Projector Lamp as the replacement lamp.
Use of any other lamps than the LMP-C162 may cause damage to the projector.

Caution
The lamp remains hot after the projector is turned off with the I/ key. If you touch the lamp, you may burn your finger. When you replace the lamp, wait for at least an hour for the lamp to cool.

Notes
- If the lamp breaks, consult with qualified personal.
- Pull out the lamp by holding the handle. If you touch the lamp, you may be burned or injured.
- When removing the lamp, make sure it remains horizontal, then pull straight up. Do not tilt the lamp. If you pull out the lamp while it is tilted and if the lamp breaks, the pieces may scatter, causing injury.

1 Turn off the projector, and disconnect the AC power cord from the AC outlet.

Note
When replacing the lamp after using the projector, wait for at least an hour for the lamp to cool.

2 Place a protective sheet (cloth) beneath the projector. Turn the projector over so you can see its underside.

3 Open the lamp cover by loosening the screw with a Phillips screwdriver.

Note
For safety reasons, do not loosen any other screws.

4 Loosen the two screws on the lamp unit with the Phillips screwdriver (1). Fold out the handle (2), then pull out the lamp unit by the handle (3).
5 Insert the new lamp all the way in until it is securely in place (①). Tighten the two screws (②). Fold down the handle to replace it (③).

Caution
Do not put your hands into the lamp replacement slot, and do not allow any liquid or other objects into the slot to avoid electrical shock or fire.

Disposal of the used lamp
For the customers in the USA
This product contains mercury. Disposal of this product may be regulated if sold in the United States. For disposal or recycling information, please contact your local authorities or the Electronics Industries Alliance (http://www.eiae.org).

Notes
- Be careful not to touch the glass surface of the lamp.
- The power will not turn on if the lamp is not secured properly.

6 Close the lamp cover and tighten the screw.

Note
Be sure to attach the lamp cover securely as it was. If not, the projector cannot be turned on.

7 Turn the projector back over.

8 Connect the power cord.
The ON/STANDBY indicator around the [I/()] key lights in red.

9 Press the following keys on the Remote Commander in the following order for less than five seconds each: RESET, [ ], [ ], ENTER.
Cleaning the Air Filter

The air filter should be cleaned every 500 hours. Remove dust from the outside of the ventilation holes with a vacuum cleaner. 500 hours are approximate. This value varies depending on the environment or how the projector is used.

When it becomes difficult to remove the dust from the filter with a vacuum cleaner, remove the air filter and wash it.

1. Turn the power off and unplug the power cord.
2. Place a protective sheet (cloth) beneath the projector and turn the projector over. Be sure that the projector is stable after turning it over.
3. Remove the air filter cover.
4. Remove the air filter.
5. Wash the air filter with a mild detergent solution and dry it in a shaded place.
6. Attach the air filter so that it fits into the each claws (14 positions) on the air filter cover and replace the cover.

Notes

- If you neglect to clean the air filter, dust may accumulate, clogging it. As a result, the temperature may rise inside the unit, leading to a possible malfunction or fire.
- Be sure to attach the air filter cover firmly; the power can not be turned on if it is not closed securely.
- The air filter has a face and a reverse side. Place the air filter so that it fits in a notch on the air filter cover.
- To erase a message, press any key on the control panel of the projector or on the remote commander.
Troubleshooting

If the projector appears to be operating erratically, try to diagnose and correct the problem using the following instructions. If the problem persists, consult with qualified Sony personnel.

**Power**

| The LAMP/COVER indicator flashes. | • The lamp cover or the air filter cover is detached.  
→ Attach the cover securely (see pages 35 and 36).  
• The electrical system may have broken down.  
→ Consult with qualified Sony personnel. |
| The LAMP/COVER indicator lights up. | • The lamp has reached the end of its life.  
→ Replace the lamp (see page 34).  
• The lamp has reached a high temperature.  
→ Wait for 45 seconds to cool the lamp and then turn on the power again.  
• If the LAMP/COVER indicator still lights even after you have replaced the lamp, the electrical system may break down.  
→ Consult with qualified Sony personnel. |
| The TEMP/FAN indicator flashes. | The fan is broken.  
→ Consult with qualified Sony personnel. |
| The TEMP/FAN indicator lights up. | • The internal temperature is unusually high.  
→ Check to see that nothing is blocking the ventilation holes.  
• The projector is being used at a high altitude.  
→ Ensure that “High Altitude Mode” on the INSTALL SETTING menu is set to “On.” |
| Both the LAMP/COVER and TEMP/FAN indicators light up. | The electrical system has broken down.  
→ Consult with qualified Sony personnel. |

| Please replace the Lamp. | • It is time to replace the lamp.  
→ Replace the lamp.  
• When this message appears even after replacing the lamp, the task has not been completed.  
→ Perform the operation of steps 8 and 9 on page 35.  
→ To erase a message, press any key on the control panel of the projector or on the remote commander. |
| Please clean the filter. | It is time to clean the filter.  
→ Clean the filter (see page 36).  
→ To erase a message, press any key on the control panel of the projector or on the remote commander. |

Specifications

Optical characteristics

Projection system
3 LCD panels, 1 lens, projection system

LCD panel
VPL-ES3: 0.63-inch SVGA panel, about 1,440,000 pixels (480,000 pixels × 3)
VPL-EX3: 0.63-inch XGA panel, about 2,360,000 pixels (786,432 pixels × 3)

Lens
1.2 times zoom lens
f 18.8 to 22.6 mm/F1.6 to 1.94

Lamp
165 W Ultra high pressure lamp

Projected picture size
40 to 300 inches (measured diagonally)

Light output
ANSI lumen1) 2000 lm
(When the Lamp Mode is set to “High.”)

Throwing distance (When placed on the floor.)
40-inch: 1.2 to 1.4 m
(3.9 to 4.6 feet)
80-inch: 2.3 to 2.8 m
(7.5 to 9.2 feet)
100-inch: 2.9 to 3.6 m
(9.5 to 11.8 feet)
150-inch: 4.4 to 5.4 m
(14.4 to 17.7 feet)
200-inch: 5.9 to 7.2 m
(19.4 to 23.6 feet)
250-inch: 7.3 to 9.0 m
(24 to 29.5 feet)
300-inch: 8.8 to 10.7 m
(28.9 to 35.1 feet)

There may be a slight difference between the actual value and the design value shown above.

1) ANSI lumen is a measuring method of American National Standard IT 7.228.

Electrical characteristics

Color system
NTSC3.58/PAL/SECAM/
NTSC4.43/PAL-M/PAL-N/
PAL60 system, switched automatically/manually
(NTSC4.43 is the color system used when playing back a video recorded in NTSC on a NTSC4.43 system VCR.)

Resolution
VPL-ES3: 500 horizontal TV lines
(Video input)
800 × 600 dots (RGB input)
VPL-EX3: 750 horizontal TV lines (Video input)

1024 × 768 dots (RGB input)

Acceptable computer signals1)

fH: 19 to 92 kHz
fV: 48 to 92 Hz
(Maximum input signal resolution:
SXGA+ 1400 × 1050
fV: 60 Hz)

1) Set the resolution and the frequency of the signal of the connected computer within the range of acceptable preset signals of the projector.

Applicable video signals
15 k RGB 50/60 Hz, Progressive component 50/60 Hz, DTV (480/60i, 575/50i, 480/60p, 575/50p, 720/60p, 720/50p, 1080/60i, 1080/50i), Composite video, Y/C video

Speaker
Monaural speaker system, 40 × 20 mm (1 5/8 × 13/16 inches)

Speaker output
1 W (max.)

Input/Output

Video input
VIDEO: phono type
Composite video: 1 Vp-p ±2 dB sync negative (75 ohms terminated)
S VIDEO: Y/C mini DIN 4-pin type
Y (luminance): 1 Vp-p ±2 dB sync negative (75 ohms terminated)
C (chrominance): burst 0.286 Vp-p ±2 dB (NTSC)
(75 ohms terminated), burst 0.3 Vp-p ±2 dB (PAL)
(75 ohms terminated)

INPUT A
HD D-sub15-pin (female)
Analog RGB/component:
R/R-Y: 0.7 Vp-p ±2 dB (75 ohms terminated)
G: 0.7 Vp-p ±2 dB (75 ohms terminated)
G with sync/Y: 1 Vp-p ±2 dB sync negative (75 ohms terminated)
B/B-Y: 0.7 Vp-p ±2 dB (75 ohms terminated)
SYNC/HD: Composite sync input: TTL level, positive/negative
Horizontal sync input: TTL level
Positive/negative VD:
Vertical sync input: TTL level, positive/negative
INPUT B (VPL-EX3 only)

- HD D-sub 15-pin (female)
- Analog RGB:
  - R: 0.7 Vp-p ±2 dB
  - (75 ohms terminated)
  - G: 0.7 Vp-p ±2 dB
  - (75 ohms terminated)
  - G with sync/Y: 1 Vp-p ±2 dB
  - sync negative (75 ohms terminated)
  - B: 0.7 Vp-p ±2 dB
  - (75 ohms terminated)
- SYNC/HD: Composite sync input: TTL level, positive/negative
- Horizontal sync input: TTL level
- Positive/negative VD:
- Vertical sync input: TTL level, positive/negative

AUDIO INPUT A/B (VPL-EX3 only)

- Stereo minijack, 500 mVrms, input impedance 47 kilohms

AUDIO
- Stereo minijack, 500 mVrms, input impedance 47 kilohms

OUTPUT MONITOR OUT: HD D-sub 15-pin (female)

- R, G, B: Gain Unity: 75 ohms
- SYNC/HD, VD: 4 Vp-p (open), 1 Vp-p (75 ohms)

AUDIO OUT (variable out):
- Stereo minijack 1 Vrms (When the volume is maximum and an input signal is 500 mVrms), output impedance 5 kilohms

REMOTE RS-232C: D-sub 9 pin

General

- Dimensions: 308 × 98 × 252 mm (12 1/4 × 3 7/8 × 10 inches) (w/h/d)
- Mass: Approx. 2.9 kg (6 lb 8 oz)
- Power requirements:
  - AC 100 to 240 V, 2.2 to 1.0 A, 50/60 Hz
- Power consumption:
  - Max. 220 W
  - in standby: 10 W
- Heat dissipation: 750.7 BTU
- Operating temperature:
  - 0°C to 35°C (32°F to 95°F)
- Operating humidity:
  - 35% to 85% (no condensation)
- Storage temperature:
  - -20°C to +60°C (−4°F to +140°F)
- Storage humidity:
  - 10% to 90%

Supplied accessories

- Remote Commander (1)
- Lithium battery CR2025 (1)
- HD D-sub 15 pin cable (1.8 m) (1)
  - (1-832-428-11, SONY)
- Carrying case (1)
- AC power cord (1)
- Operating Instructions (CD-ROM) (1)
- Quick Reference Manual (1)
- Safety Regulations (1)
- Security Label (1)

Design and specifications are subject to change without notice.

Optional accessories

- Projector Lamp
  - LMP-C162(for replacement)

Some of the items may not be available in some areas. For details, please consult your nearest Sony dealer.

Pin assignment

INPUT A connector (HD D-sub 15-pin, female)

INPUT B connector (HD D-sub 15-pin, female) (VPL-EX3 only)
RS-232C connector (D-sub 9 pin, female)

</table>
When a signal other than the preset signals shown above is input, the picture may not be displayed properly.

For the Memory No.49*, the smart APA function and the APA key of the remote commander do not active. Make adjustments for the input signal using the Adjust Signal... on the INPUT SETTING menu.

When an SXGA+ signal is input, the image may extend beyond the edges of the screen. In this case, input a signal with no black edges around the image, and disconnect and reconnect the cable or select the input signal by pressing the INPUT key.

This section describes the examples of installing the projector on a desk, etc.

See the chart on page 47 concerning the installation measurements.

The alphabetical letters in the illustration indicate the distances below.

- **a**: distance between the screen and the center of the lens
- **b**: distance between the floor and the center of the lens
- **c**: distance between the floor and the bottom of the adjusters of the projector
- **x**: distance between the floor and the center of the screen (free)
The above-mentioned numerical values differ from the design values because the values in the table include a tolerance.

\[
a (N) = (SS \times 18.56/0.6299) - 24.0 \times 1.03
\]
\[
a (M) = (SS \times 22.61/0.6299) - 24.0 \times 0.97
\]
\[
b = x-(SS/0.6299 \times 3.2)
\]
\[
c = x-(SS/0.6299 \times 3.2 + 67.6)
\]

The installation measurements and their calculation method for each lens are shown above.

The alphabetical letters in the charts and calculation methods indicate the following.

**SS**: screen size measured diagonally (inches)

**a**: distance between the screen and the center of the lens

**b**: distance between the floor and the center of the lens

**c**: distance between the floor and the adjusters of the projector

**x**: free

**N**: minimum

**M**: maximum

Unit: mm (inches)
This section describes the examples for installing the projector on the ceiling. When installing the projector on the ceiling, use a Projector Suspension Support recommended by Sony. For ceiling installation, ask for qualified Sony personnel. See the chart on page 49 concerning the installation measurements.

The alphabetical letters in the illustrations indicate the distances below.
- \( a' \): distance between the hole (front) for mounting a projector suspension support on bottom surface of this projector and the center of the screen
- \( b \): distance between the hole (front) for mounting a projector suspension support on bottom surface of this projector and the ceiling
- \( x \): distance between the ceiling and the center of the screen
The installation measurements and their calculation method for each lens are shown above.

The alphabetical letters in the charts and calculation methods indicate the following.

**SS**: screen size measured diagonally (inches)

**a'**: distance between the hole (front) for mounting a projector suspension support on bottom surface of this projector and the center of the screen

**b**: distance between the hole (front) for mounting a projector suspension support on bottom surface of this projector and the ceiling

**x**: distance between the center of the screen and the ceiling

**N**: minimum

**M**: maximum

(The above-mentioned numerical values differ from the design values because the values in the table include a tolerance.)

\[
a'(N) = \{(SS \times 18.56/0.6299) + 3.3\} \times 1.03
\]

\[
a'(M) = \{(SS \times 22.61/0.6299) + 3.3\} \times 0.97
\]

\[
x = b + (SS/0.6299 \times 3.2 + 57.0)
\]
